

WITNESS AND ADVOCACY

One of our core commitments is to publically demonstrate our opposition to racial injustice and our support for racial equality. We join with members and friends of our church and collaborate with other racial justice organizations in making bold statements about policies and practices with which we disagree and those we encourage.

Marches, signage and testimonials boldly proclaim our yearning for a free and just society. Public proclamations make our values visible to the community at large and community awareness is intended to prompt personal and institutional change that will benefit the cause of racial justice.
